PR38	3/8" Yellow Polypropylene Rope (630 ft./per spool)	.40/ft.

**Raychem
 WinterGard Wet**

WinterGard Wet heating cable is a professional-grade, 6-watt/foot, self-regulating electrical cable that can be used for pipe freeze protection and roof and gutter de-icing. The heating cable is constructed of nickel-copper bus wires, a self-regulating conductive core, an insulating jacket, a tinned-copper braid and an outer polyolefin jacket. The benefits of using WinterGard Wet self-regulating are many; it can be overlapped, cut to length will not burn out, saves energy and it will not overheat roofing materials or plastic gutters. The WinterGard Wet pipe freeze protection and roof and gutter de-icing systems are UL Listed and CSA Certified for use in nonhazardous areas.

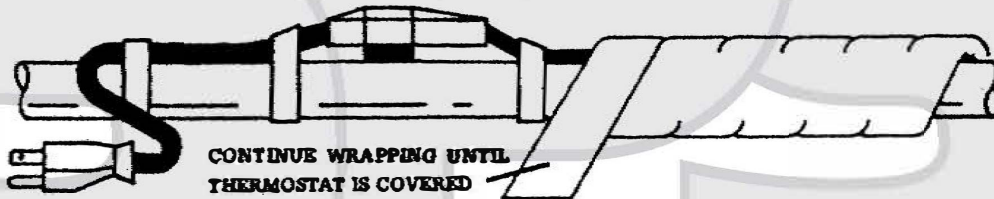

Heating cable type	Circuit breaker rating (amps)	Maximum heater length (ft) per circuit for minimum start-up temperature
